The Fifth Book

Written By Gaddafi's Cheapskate Copy (Alias)

"O humanity! Indeed, We created you from a male and a female and made you into peoples and tribes so that you may ˹get to˺ know one another. Surely the most noble of you in the sight of Allah is the most righteous among you. Allah is truly All-Knowing, All-Aware."

-The Koran, Chapter: The Rooms, Verse: 13, Translated by Dr. Mustafa Khattab, Included in the Clear Quran.

"the love of money is a root of all kinds of evil”

- *The Holy Bible, Chapter: 1 Timothy, Verse: 6:10*

Introduction

From the author

The *Ideologies* that has been wished to exist but failed miserably, some ideologies that my friends created are crazy to the extent that it is just an ideology that is randomized.

If everyone surely had one idea and ideology the world would be good right? Wrong! If someone acts differently, they become a problem and that problem is hated and after a few years there is a revolution and other more, so no if one had ideologies that is one and nothing more it would be universal problem, if you surely try to establish a one ideal utopia it would be immediately ruined.

This book is meant to replace radical ideological ideas and to be a replacement for extreme right-wing ideologies, extreme left-wing ideologies, extreme race supremacist and authoritarianism, and work as a framework for any ideological stance.

The greater good of humanity is the dream that we can accomplish but the greater capital-gluttony and exploitation of people's life for profit is the reason we cannot accomplish that dream, for the greater chance, we will succeed, but for once please excuse me for my any contradictory ideas, I suggest you

try to find ideas that is corelating for your idea and take it to an extent to develop a new ideological perspective, rather than stay dogmatical to an ideological that focuses on a personality cult like

And to be exact this is a framework for any ideology to develop, it is an ideology but also a framework for ideologies that is currently struggling to be non-authoritarian, to be honest this ideological framework was intended to be a system against failed systems.

The First Main Pursuit

The governance system and the solution within semi-direct democracy and inches of the systematic way for a basis of government and law

The Governmental charter

The charter of the government is universal for the countries that is willing to be the subject of the universal ideology in which if we put it on a perspective it will work but sometimes charters like the united nations are not taken seriously and the Pancasila ideology in which has one of the unique ideologies ever and its significance in Indonesia, sadly these charters and ideology aren't taken as seriously because people focus on their own lives rather than ideologies that can help them in some aspects of life, anyways here's the charter.

The Governmental Points Of The Fifth International Theory

a. The government of the universal people may not try to exploit the people's tax money for their nepotism and their own egoism, or they will face consequences.
b. The people may express their distaste on the government but does not get the permission to break public goods created by the government, if the forces killed the protestor, then the people need to inform what has happen to the State to resolve it peacefully or not and legally
c. The regional government must inform their task every three months if they submit a false report then they may face consequences.

d. The government can adopt an ideological idea in which includes the protections of humans, the rationality of their founding fathers.
e. The state must take affairs and help the structures or people in hardship within the government's monetary or treasury
f. If a government is in a crisis of stabilization, then it must implement a fifteen-week mandatory martial law to enforce order, this is for temporary emergency only
g. The state must recognize that there is major religions in the country, no religion may enforce political authority or dominate the government, but the government can take some religious doctrines to be an absolute truth except doctrines of authoritarianism.
h. The country that holds *The Fifth International Theory* must develop itself without any corrupt pragmatism in its way, it is to develop within the treasury but if they cannot then wait for the economy to develop then develop little by little, to pursuit that dream you must remove the parasites that slows the economic development
i. The price of food and water must be low and not be heighten and controlled by the state, so the people can exceptionally get everything without an expensive cost to care
j. Healthcare and birth is free of cost, without exception, medical items are given from the government and medical affairs of the area, development of the healthcare system is a must.

k. Any coherent ideologies is permitted but if one is taken an approach on radicalism then it is permitted but they must obey the state.
l. If any radical or extremist groups or other bullshit cults plans to cross the line by committing any violence, or crimes including forcing of an act without consent or anything then the organization may be captured and arrested.
m. Radical or left- or right-wing ideologies is permitted at the parliament, but they must respect and dedicate for the state.

I think that is enough for the charter, it is direct and not metaphysical, and to clear things out, yes the state must provide free speech but they must be against accelerationism and anarchist or other hard left or right ideologies that wants the end to society or to radicalise every sector (In short it means it is against the idea of absolute free speech), if the person does not adhere any party then it is independent in any sense of ideology but still labelled as it, extreme ideology stance on religion or political wings may be permitted but with restrictions for example “a” is a Radical Eco-Fascist and “b” is a right-wing Christian, both of them have rights obviously and they may criticked the government and its laziness but does not get a way to be a revolution.

For context, the martial law is to enforce when the state and country is suffering internal problems, the initiators are head of states, approved by the supreme court, the military administration will replace part of the civil legislation to charge insurgents and other who participate against the government, if

this martial law decree is expired and the ongoing chaos won't stop then issue a "*National Standard Martial Decree*" which issues a full on nation-wide legal full on conduct on the state, if the decree is established by the supreme court then the military administration will replace half of the civil administration and to stabilise even more areas in the Country, The Decree will only last five years, no less, no extent by anyone, even if the Head of State enforces it, but if the stability is far more lower to expect then create another decree.

The Justice System

The ideal justice system I propose is the *Equity system* which if in theory is a combination of natural values within restorative justice. In theoretical ways it will works, well I do not know, surely it will work, here is the point I will write, still limits too.

a. The values of the *Equity system* is that it does not accept any illegal transactions to free someone nor to get low sentences, if one is doing it to a judge or any people that upholds the values, that person who accepts or gives the illegal doings shall be convicted on the case and be imprisoned immediately.
b. The system fairness, equality, anti-favouritism, anti-nepotism, anti-corruption is eternal in the justice system, and none can change it, if one did then one has corrupted the system, and the system has become unpure
c. The sole purpose of the *Equity System* is to serve justice equally and rehabilitate the victim and perpetrator, it is to serve justice and rehabilitate those who suffer and offense (especially radicalise people)
d. The *Equity System* has its own systematic ways of its things, for example the system captured the perpetrator and gives the perpetrator the justice he deserves but also rehabilitations if the victim's family implies forgiveness

e. The system does not give tolerance to anyone who discriminates against one another and does not give tolerance nor parole to anyone who are parts of organized terror attacks or terrorist groups, or anything, all are equal in the eye of law.

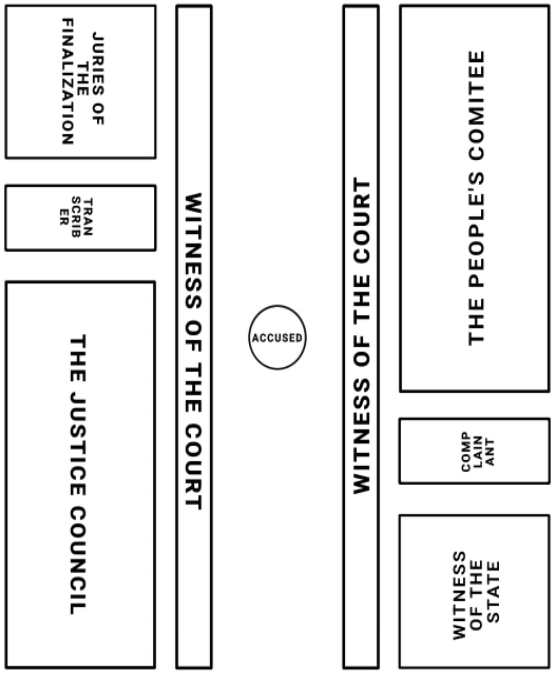
To be exact this system has two main flows, not flaws, one side are based on meritocracy (which I mean is the justice council) and one are based on the masses (which is the People's committee, both councils are to minimize nepotic and oligarchy and to improve the justice system given, witness of the state which will be government officials will also witness the court to strengthen the authority and legality of the court session.

And to be exactly precise these standard points are to be followed accordingly for the law systematisms and to not disturb its process or it will condense into something worse than the Racial conflict that is happening on earth, or maybe something better, God knows.

Since the human nature is implied to do something that is based on instincts and a sense of power which can trigger a symptom of merciless towards those whom they want to judge so then it may, we must recruit those who can control their emotions and value the law more than their emotions.

The Proposed Courtroom For The National Issues

(To be use for issues regarding the serious transgressions)



As you can see, this is the proposition that I have been working on, it is like a parliament rather than a courtroom, but it works, considering that this idea may work in some places, but it is unknown of if the systematic way of the courtroom works.

To clarify things The finalization juries are those who are mostly legal experts or anything that is related to law or such, these people are selectively chosen for their skills or meritocracy to be exact, and the people's committee are comprised of appointed civilians whom are chosen based on background and others which they will play a significant role in finding facts and to be temporary law deciders before the justice councils will review, complainant will be place accordingly so the complainant will explain the situation, and these councils of justiciar are equal in all means and one cannot be more equal than the other, the council are to be the final reasoning of the punishment that the juries of finalization will decide, the people's committee are meant to be people who indirectly and directly are part of the court system. The tiebreaker or the authority are the Juries of the Finalization, so they must agree on one verdict and extra verdicts that the juries had developed, and I will write the code of ethics.

1. This system has three sequences on trials, by this I meant that juries has three chances to think about their choices and that is accordance within human rights and unwritten or written laws.
2. The court and dispute must be decided on, if the evidence or system says that evidence needs to be available for next month then after evidence is gathered then it is sufficient to do a court session.
3. If there is no sufficient evidence, then this court may extend up to another week to find sufficient evidence and to convict the person of the crime that the convicted is accused of, if its longer of than more than a week then it must use conventional means then a

month is extended or if the whole evidence is not gathered yet then it will extent for how long till the evidence is gathered into a singular long ass file book

4. If the supreme court issues a change of the people's committee, then change only the 25% of the committee, the committee needs to undergo interrogation after the change of committee to determine if the judge pays them
5. After the verdict invokes the justice by punishment then punishment is implied first with implied rehabilitation but if the crimes has been done for more than one time then the court may decide death or other means, but there must a be surveillance method for lowering chances of more radicalization

This system is not enforced for any courtroom, but it is a system that I'm willing to use, I look forward to traditional courtrooms, but I do not enforce anyone to use it, it's just what I've developed.

I personally will imply some Islamic policies including what you people call extreme, which is "Cross Amputation" which if you see about it, that those who steal the people's money or corruption may get their left hand, right foot, chopped out, this only applies for those who has done certain crimes that ruins the people, and those who kills a person has the chance of Forced Labour of Execution based on court rulings or Blood money or forgiveness if the family chooses to forgive or the opposite, but if the family chooses to forgive then it is compulsory to use that prisoner and jail them based on law, you can't get free labour if

you recruit them but if they are prisoners then its best to use their powers and supervise them

There is two types of death reparation, the first is reparation of the soul, which means probable death, which the method is not slow and painful but fast and precise as death is paid with death and then there is Reparation of the body, which mean forced labourism or "*A life for a life, an eye for an eye, a nose for a nose, an ear for an ear, a tooth for a tooth—and for wounds equal retaliation.*" Based on certain degrees of violence or crimes These are to enforce, those who aren't willing and thinks that the law will protect them, their dumbasses won't say much if I destroy their hands entirely with a butcher's knife, not a threat but as a warning to those who aren't willing, but hey, death is not probable, so the family's best choice to do is forgive and we force the accused with being laboured with commercial food chains or mining certain ores or anything and etc.

And honestly these policies applies for those who receive what the family of the victim wanted or what the court has ruled, if the outcome was not terrible then sometimes the court decides on compensation or prison time or rehabilitation with the combo, and seriously these type of people are those who are seriously incompetent in holding the anger they hold up and anyways continuing the next chapter.

But in general, Human rights said that humans are valuable and must be protected so in general I must revise it to make it forced labour, the punishment of killing a person is not an eye for an

eye anymore, its forced labour and maybe a little restorative justice, in genuine senses, but if the masses care about justice then the punishment of the same equal sense is put into place, but if the people cared about huma right then forced labour.

But in actual generality, this system of Forced Labor or Death is an extreme measure, so in general this will be used temporarily as a substitute or medicine against criminals, after the crimes are at a stable level, the state must remove the policy, except forced labour, you need them for work, so in the end the law that will be implemented is forced labour for around 15-21 Years in generality, and on the general aspect of cross amputation, it won't be used, as Hudud is seen extreme at this time but not for some people I will address later.

(This system can be used for area with but to remarkably high violences and crimes be honest I do not think anyone will even adopt this system, not recommended to be honest)

Government Monetary

The government of the people must have its dignity or rather their strength, if one government fails then the others fail, if one to torch himself then one area has a revolution, if a stable government were here, I would like the idea of it but since humans are practical Materialist from the start, that's impossible.

For some people Materialism (Capitalist Globalism) can be fought on with systems that control the economical state and the value of the printed money or maybe Dinars and Dirhams to be fair It should be Money that is from paper and printed with image, one currency must be backed by something stronger rather than equal, The united states dollars is backed by gold but now it's back by itself, Gaddafi's currency is backed by gold and then civil war happens because of it.

If one to acquire such currency then you should not make your system backed by itself, it would not be of value instead you have to back it with something worth more for example a currency name "Akra" it is a money that is printed and it is backed by diamonds in which the worthiness of it is more than gold if you see, or "Roping" which is backed by iron which is worth less but worth something, it is contractionary to equalise the monetary within itself, if the monetary system does that then

the value of that printed money has plummeted down considering its strength is not liable.

The monetary system must be controlled by the right hands not by the person who is greedy and narcissistic, if one to hire in which is in fact a liar, it is untreatable and unworthy, The human mind is unspeakably talk for justice, but they don't wait for justiciable way to come rather they make them suffer unexpected words that may make an old person suffer a heart attack, the human mind also works for themselves if one sees then one does, but if they don't really work rather controlled or ordered to do then, it is expected that these people do are done by their rationality or maybe the follow-order spectrum, we should not give nor take money from governmental stalls expected to do "an exploration on political meritocracy" we should not fund those people, who claims this without proof.

We should not entrust people on which we know are intact hypocrites lurking as people who are rated as perfect in society, the people's money should be within the *Three principles of monetary affairs* which is.

a. Entrust within people who are trustable and do not stir intentions that will ignite the boiling tensions, if it is a must then do an inspection on him mentally and physically.
b. Protect the people's money within the range of systematically ways to protect the assets

c. Without caring ideologies and religion and other things, the travelling assets should be protected

The people's monetary should be in good hands and never be touched by corrupt politicians, enforcing this may lead to aa great start of the monetary effects.

it should abandon the Petro-dollar system and the Brent Wood monetary system (As in for the Brent-Wood system of the United States) for it is a slave auction for the country, but it is suggested not to follow such ideal monetary system because the dollar cannot be exchanged for gold since the year Nineteen Seventy-One.

The United States Dollar is a strong currency but its slowly dwindling because its deferral reserves keep producing bonds for satellite states and to spy on socialist states to plan a self-inflicted civil war, for example the imperialist has destroyed such beautiful countries, turned it into a capitalist waste heaven for the west considering that all falls lead to civil wars because of an unstable body of government, many states now is exploited of its resources including the oils that is exploited, and now a certain imperialism called freedom as they say or what I like to call "Liberation for Oil", which is obvious because the Oil Reserves of some states are actually higher than some dessert states or gulf states, the imperialist states aren't willing to negotiate shit, and this will have a probable revision in the next pursuit.

In which in the meantime ill mention that many countries that has been intervened or helped has been led into civil war and instability or even a failed state position.

4

People's Act of Service

Every people should have the rights to be help no matter what, if one is disabled to do certain things in public, physically or economically then the government must impose a policy in where those who fall into darkness should be helped for example for those who experience loss of everything then the community should help as soon as possible before the state gives him a permanent residency, for example give him a temporary shelter if the commune wills before getting helped financially from the government, but if those who suffer an addiction for example drugs, must be rehabilitated first then given help from the government.

You must know progressiveness has to be the one to start a new life or ruin one but sometimes the homeless has to be given a new place to start over, if someone is convicted of a certain crime then he must have been rehabilitated if he willingly listen to sermons and gatherings during his serving time or execution (Execution can mean public punishment including canning and such others)

You must know that every person can have his ways, one who follows the order and one who wishes to be whipped, or maybe face execution, I mean his choice is his choice, if he turns to the way of following the law then he may be the person that

deserves a change, for example, if a person who is a person who respects and honours the law and faces economic pressure and has an economic crisis, and he has nothing left, then the state and the community must help those in need.

The poor or needy needs to have a place to live provided by the state and the community must provide the needy with help including material and monetary affairs for example money, clothing, food, etc. because they (The state and community) must provide those in need with voluntary help and mandatory help, also the state must try to provide the needy with a consistent Job, in which that person is an expert in the Job, the state must try to provide that Job and if the person did not pass any meritocratic system then he must get a job that pays him fairly.

The elderly, the younglings, the progressive, the reactionaries, the Muslims, the Christians, the disabled, they must be fulfilled by what? The elderlies and the disabled, they need to have a universal place to be taken care of, transportations, homes, and other things, the progressive and reactionaries, you don't listen to them but ensure they have food and other commodities, the Muslims & Christian, what should you do? Create a place of worship for them, separately, separate buildings but under a banner they are safe, those who are in the state must be provided.

Tribal Distinction

These distinction in tribes, races, and other things should not be cared of nor matter if you are Jewish, White, Brown or European should not be taken care of because these race war only end up in somethings that will make the countries that exist today destroyed piece by piece, these Racial conflicts lead us to hatred towards each other which is objectively stupid considering that the humans are connected to each other no matter the difference, we are making ourselves fools for hating people who are actually related to us.

We humans shall erase these distinctions and unite under one banner and one motto, we shall live, struggle, and try to remove distinction amongst people, Racial conflict will cause death to people who are innocent by heart and actions.

Do we want death to some people who are simply different to us? By your actions you're creating an aesthetic in which creates a division of race to race? Really if you do you are a rhetorical human who tries to take things seriously just to end up being laughed because of your failed idealism.

We should enforce unity and tolerance amongst the people because these distinctions are the reason that humans split up

into groups that will lead to a revolution like extremist did, they try to create a utopia in which consist of their own kind and to erase an objective idea and fail.

We should not make Racism a norm, a thing that is despised into a norm? by God what kind of nightmare is that?

Enforce the kind of things against Racism or Chauvinism, and all the people within all races will unite under a banner and motto, but sadly these unity does not last long because of online and offline sleeper cell extremist spreading propaganda and indoctrinating people with the wrong teachings or the extreme teachings about misanthropy or the end of society so they can restart to a society of one race only or one religion, they are splitting our unity for their own desires for a state which will create a failed state, we should stop that kind of propaganda which is destroying our unity, but in a social way and identify these cells.

This is online terrorism, that we can combat but we can't stop it instantly, These people instantly indoctrinate children with their ideology which is relativist, we may fight it, but we fail, it's a not we can't, they are those who spread but destroy social norms.

Under a banner and a constitution, the masses must be protected or they protect themselves.

Internal Ethno-Nationalism

If you correctly see, ethno-feudalism happens because the people sometimes see that the person that are maybe people of different ethnic group or different religious beliefs and they use the opportunity to use the pretence of the past as a reason they have to do all of their works or have to submit and accept the role that they have and not rise up the ranks, which is not what the *Fifth International Theory* even teaches this is not even in theory, if this happens then there is no equality imposed so in theory the country that has this ideology imposed is not even adhering the ideology, they labelled it as *The Fifth International Theory* but in reality they are a nepotist feudalist country who divides each other because of race and ethnic groups.

We should abolish such things that are in this world such as nepotism, feudalism, and other bullshits

Traditionally, from old teachings and modern teachings of the year two-thousand and twenty-five emphasizes that every people is equal no matter what religion or race well in the old teachings it says for those who believe evenly, but it emphasize on equality, no feudalist idealism, no nepotist materialism, just pure equalise no person is better than the other, a white man is not better than a black man, a black man is not better to an Arab man, a black woman is not better than a white woman, and a

white woman is not better than an Arab woman, there is equality but people still idealise on a one race system which is retarded in my senses.

Government pay

The workers for the government should not be paid in heavy cashes, this is to stabilise the pays of the people and to not start a corruption scandal considering that corruption is creating a regime that will topple down itself.

The people shall enforce of pressure if the government insist on putting out the bonus that it has given to the workers of the government, if the workers are that hungry for money why not find other side term jobs? Some corruptors cannot handle the greed and urge to get more money; these materialist liars are pure hypocrites that cannot outstand their urges for their own good and nepotism.

These are strict guidelines to the people's workers of the government; the pay should be enough for them to survive a year or so, these will be specified in the next Pursuit.

Religious affairs

On the issues of religious affairs is that it is a secular system (The state mandatory law), you are allowed to change and change as you wish, but for the issues of extreme teachings and indoctrination you will face backlash from the public but if you wish to do violence and other crimes in the name of some god, you may face consequences from the court, considering that all people should respect every people no matter their religious alliance to other places, if you wish to hate or do something to hate another god of a person then you can do anything but prepare for the backlash.

For the issues of cults, these cults are strictly monitored on their doings considering these cults cause chaos or unmoral acts accordance with their leader of to appease their own god or to face some salvation for the people that won't do much in real life.

These problems are the root of religious extremism, you must know there is limits to words, every word has a limit, there is no genuine free speech in life, you will be imprisoned due to anything related to terrorism or other things, but the people must be moderate on the affairs on religion, and how do you control the people to become a religious moderate? Teach them, gather around, and teach them against the extremist ideals, like Neo-

Liberalism, or Authoritarian Communism, I mean, these ideas are dangerous to the state, why is it dangerous? Because it teaches fully about the ideas of two, individualism for the Liberals and Full Communalism for the Authoritarian Communist, these ideals are not supported by the Theory because the theory is based on two things, Islamic Socialism, and Justice with Rehabilitation Characteristics, both to my understanding has one thing in common, Tolerance & Unity under one Banner.

Unity, it's not about religion or executions, no! it's about tolerance and unity under a constitution that accepts the existence of other religions and a permanent term for them to practice their religion.

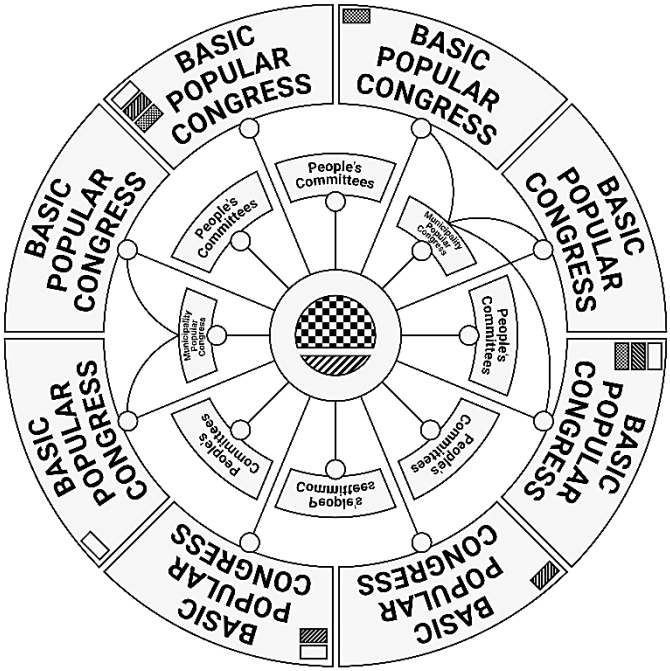
Main Parliament

The parliament is to be the decisions that will decide the ethics in the country that will be a decision for justice, gender decisions, on the ethics of people's justice, on the use of communication devices, public transport and other things that will prolong the country on a path of succession.

To be exact, these rigid political parties can be a trap for dictatorial system for example, a 51 percent vote can create a dictatorial system with false democratic characteristics, in which the democratic system must fight and frame each other if will to preserves its legitimacy but to be a direct system you must remove such framed system and replace it with a democracy ruled by the people r example, the next image will give an example, if you implement direct democracy, but in general political parties works with these two things, either they help those in need and to contribute for the state, they have no political legitimacy anywhere but only somewhere in the lower house.

The Proposed Jamahiriya People's Committee

(Found in the Green Book, Designed By Muammar Gaddafi)



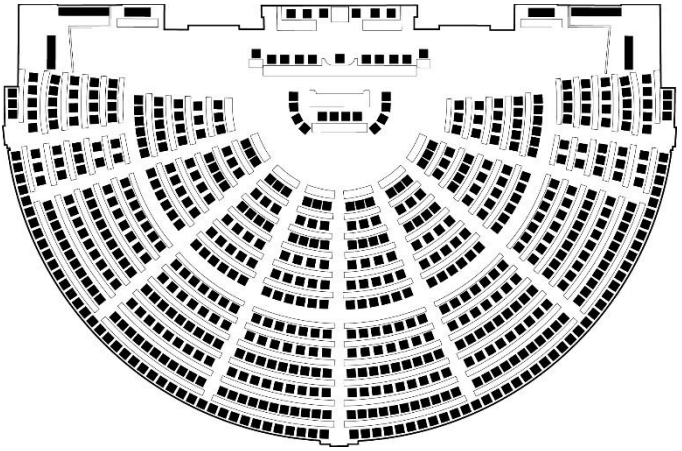
As you can see, this is the design that Muammar Gaddafi has created for the people's committee and popular conference in which if we see, Gaddafi put out a hierarchy in which Gaddafi has used for its democratic system, representation is a fraud based on Gaddafi's works and Gaddafi is a populist dictator but his design of the Committee is much interesting, Gaddafi express love for Direct Democracy to people's committee and conferences because he does not trust representative democracy

and he believes this lead to the influx to a one personality cult system with a democratic way somehow, personally representative democracy creates weak men who can't even control his people but direct democracy with a one systematic leader who is a tyrant or non-tyrant but you must know systematically that the Fifth International Theory accepts two Democracy, Semi-Direct Democracy and Direct Democracy, but the Direct Democracy has a condition installed for it, For example the nation's population is large, around 230 Million people, you can't install it because it would be at a fortune and cost so much that you can't even lose millions, you could lose billions, if you use it too long, or you can subsidise it to a degraded form of democracy.

Personally, if I even supported Representative democracy, I would have chosen a traditional type of parliament to emphasize on opinion sharing like for example, the National Assembly Parliament.

The National Assembly

(Designed by Lorenzo Giardini, Pierre-Cailleteau, Jean Aubert, Jacques Gabriel)



These types of parliaments I would imply if I supported a democracy that allows representative to be upfront, personally, but I personally despise it not because I support a Vanguard state, no but I won't because out of fear, fear that this (Representative) democracy will create a dictatorship based on a personality cult, but that cult is only around like 2 terms or more, but hey, there's an opportunity to overthrow with rampant force, based on the constitution, if there is none, just revolt at this point, but in actually generality just because the voting system is around a different percentage we have bad leaders, so in general the vanguard parties are implemented to choose good leaders, but I don't support vanguardism, but the parliament looks good.

Democracy

Representative Democracy is a disaster, and a weld shut way that can be opened with a certain tool that a dictator carried, this democracy is not pure democracy, because they can remove certain political limitations, this is why Semi-Direct Democracy is the way, because it is the legitimacy of the people and the masses are those who are reasonable for such actions, a direct democracy with a president is possible, with a democracy and legitimacy like that it would be reasonable to add a technocratic semi parliament (The Upper House of the legislature) while the People's Main Committee is the Lower House of the legislature.

This follows a strategic planning, for example there are countries that has a parliament consisted of members that are based on two consistent roles, The House of the Lords, The House of the Commons, but you can incorporate some democratic elements to a already democratic way, basically representative democracy for the "Representative Democracy" for a good democracy, that leads to neo liberal democracy, which I suggest is not good. Every democracy does not need false representations; every representation are rather fraudulent or practical and suggesting that some people use commodities of representation to lie and use corrupt funds that may be trusted by the government, they are one of the most people that will allow to unjust to happen because they only care about people who have their lineage or relative friends and families, its nepotism, if the masses follow it and choose a corrupt leader

and to get rid of this unjust systems there must be a revolution, a revolution that the people will get rid of nepotism and schemes of corruption, you can't get rid of corruption purely but if people once rule with certain laws that protect them, then they will do whatever they want including nepotism and corruption, all people are equal in the eye of law, just because there is certain rights that restrict judgement onto the person does not mean you can't take them to law, these restrictions if implied, would be great if the law removed nay laws that protect certain individual rights with power, if a person did wrongdoings then convict them, convict them of the crimes of the wrongdoings they did.

Any law that gives protection to a certain people of power is not even law, its unjust, these unjust are not democratic. The people are equal and can participate on it, but if they did certain things that are banned in the law, they can get prepared for their court date and some cross amputation (During the era of struggle or crimes), democracy demands equal rights for every single human being that lives in the state, the only solution if Semi-Direct/Direct Democracy fails is fixated Representative Democracy but you can choose a Dictatorship, but you can overthrow the dictator because the Theory allows freedom to rebel against an unjust corrupt leader.

Now, in case if the Populist votes against the Technocratic House, there will be a special case, there will be a Certain type of ministry, called the Grand Mahkama of the People's Assembly (Grand Senior of the Parliament) in which the case that upholds why it should be implemented and the Grand Senior of the Parliament shall discuss the matters with the technocratic board to implement it or not.
